## Active Wildlife Protection Airspace during Competition

X01, Flims, min Height 2650m

X10, Garvera, min Height 2150m

X12, Val Lavaz, min Height 2750m

Scalottas, min Height 2200m

Height everywhere 3950m

Take note of the information given at the briefings.

## Organize your retrieve with search.ch

Go to [map.search.ch](http://map.search.ch) (Link on disentis-open.ch)

Click the „Locate me“ button

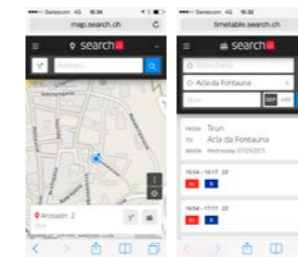

Click on „Route“ button

Click on the map and choose „Train“

Enter „Acla da Fontaun“ as destination

You will get your next connections back to HQ

Never forget to devalue one field on your value-card before entering a train!

## Normal Report Back Procedure

When you land, your live tracker will detect your landing and, a few minutes later, will emit a siren sound and display a menu:

- Retrieve Needed (no „classic“ retrieve available, you will get informations by SMS from HQ)
- Retrieve Not Needed (normal option to use, you use public transport)
- Require Assistance (only choose, if you are injured; this option will be treated as a call to the emergency services).

After a delay, you will receive an acknowledgement on your live tracker; until this acknowledgement is received, you cannot consider yourself reported back.

If you move, or your status changes, or you choose an incorrect option, simply report back again to give the organisation the most up to date information.

If you cannot obtain an acknowledgement, you can report back by SMS. Simply send a message containing your pilot number and your UTM X and Y coordinates to the SMS Check-in number. The SMS can contain other supplementary information.

After a delay, you will receive an acknowledgement SMS; until this acknowledgement is received, you cannot consider yourself reported back.

## Report Back with SMS-System

Send an SMS with the text „para stop“ (without quotes) to +41 79 381 60 10

You can add additional information after „para stop“ to the message. For example you could send „para stop Landed in Ilanz“.

## Confirmation message

You have to get an automatic confirmation message. If not, the Report Back failed!

If both Report Back possibilities fail, you need to report back using the Retrieve Voice Phone.
